

Academic Mentoring Day

Student Guidance

You are going to produce a 5 minute presentation on your academic progress.

You are going to deliver this presentation to your tutor and parent(s).

The presentation will be based on your progress data and not on how much you like a subject.

The presentation **should not** be produced on a computer (e.g powerpoint).

You will need the following things to produce your presentation:

- Your last 3 school reports.
- Teacher comments from 1:1 conversations.

Your presentation will be split into 4 parts:

1. What you are making progress in.
2. What you are not making progress in.
3. What you consider to be a perfect lesson.
4. Targets for the future.

You are expected to make 2 sub-levels of progress in every subject every year - on your school report highlight every subject that shows 2 or more sub-levels of progress.

What do you think has helped you achieve this level of progress in these lessons?

What do you think has prevented you from achieving 2 sub-levels of progress in the other subjects?
(You should not blame poor behaviour for a lack of progress)

What advice have you been given by your teachers on how you could have made more progress?

Describe the type of activities that help you to learn - why do you think you learn best in this way?

What are the 3 things you would like to improve on this term?

What do you need to do to achieve these things?

What help will you need to achieve these things?
